

# **Blazingnest Plugin Documentation**

A guide to using the NestizzatoreNuevoCommand plugin for Rhino3D software, including installation instructions and details on its functionality.

# Installation

- Requires Rhino3D software to be installed
- Download plugin from source
- Copy plugin to "C:\Program Files\Rhinoceros 7\Plug-ins"
- Open Rhino3D and type "NestizzatoreNuevoCommand" in command line to use

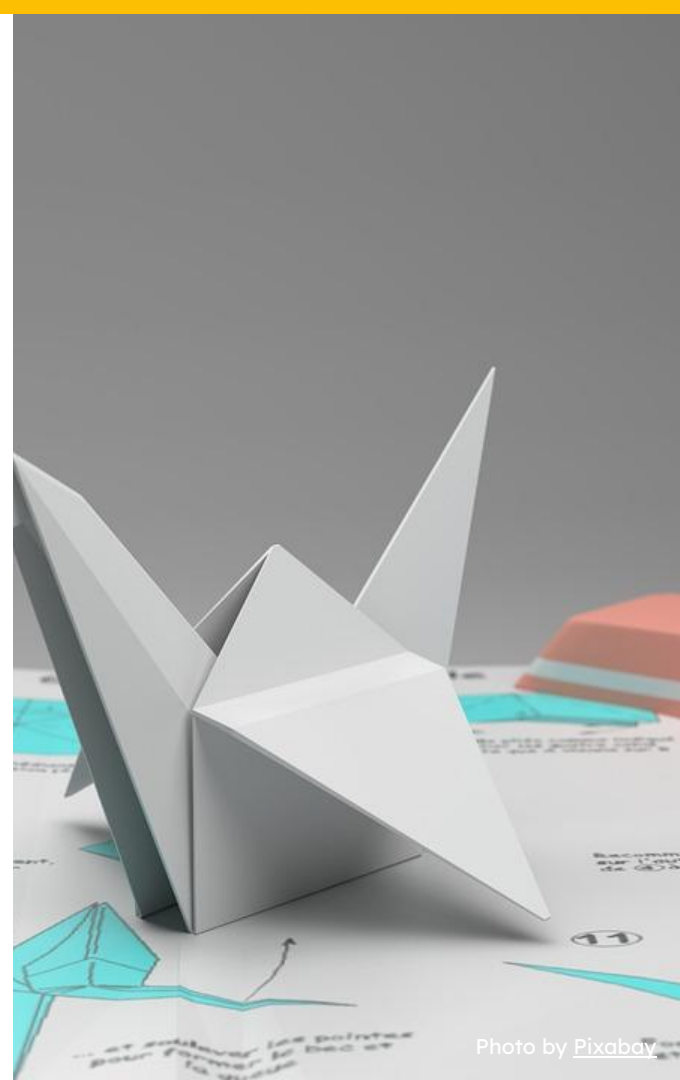

# Usage

- Run plugin with "BlazingNestFreeCommand" in the console
- Select part to create the CNC cutting
- Click the "Run Command" button

# Functionality

- Plugin will detect the face with the most marks
- Calculates optimal face based on the amount of marks
- Orients Brep to WorldXYPlane and adds transformed curves to document

**Thank you for your time 😊**
